

Postdoctoral position

control processes

The Aronlab at UCSD is focused on fronto-basal-ganglia circuits for response control in humans.

A funded postdoctoral position exists (from June 2017) for candidates wanting to work in any of the following areas:

- **Cognitive Psychology** of cognitive control and working memory
- **Electrophysiology** (EEG/LFP), especially using time-frequency methods, with interest in cognition
- **functional MRI**, especially using MVPA/classifiers, with interest in cognition

Candidates should hold a PhD or be about to be awarded one.

The lab has excellent local and collaborative research resources, including fMRI, TMS and EEG/ECOG. There is also a patient-related component in Parkinson's disease. There is a broad psychology and neuroscience community at UCSD, moreover in a stunning location.

Please contact adamaron@ucsd.edu for more information or simply apply for the position by emailing your application (including a cover letter describing your research interests and match with the lab, a curriculum vitae, and contact information for references).
